The combination of light weight silk material and wool roving felted together creates 'Nuno' felt. This is beautiful light weight material can be used for garments, scarfs, wraps and in soft furnishings. There are a multitude of ways to create Nuno felt from creating very light 'cobweb' material to high textured pieces that include 'waves', 'roses' and 'rivers' of texture made by manipulating the silk and wool. In this workshop we will dye our silk using the 'microwave method' and then we will create an infinity shrug or wrap as well as have fun playing with other Nuno felting methods.

Although this workshop includes advanced techniques, it is still suitable for anyone with very little experience in felting.
